Navakrishi — Fresh Farm Produce, Direct to You

Introduction

Navakrishi connects local farmers with customers through a simple, trustworthy marketplace that delivers fresh, seasonal produce directly from farms. We focus on quality, transparency, and supporting sustainable agriculture.

AI, IoT, and NLP Features

Navakrishi now includes a practical smart agriculture assistant that combines three capabilities in one workflow:

- AgriNLP Assistant: farmers can ask questions in natural language and receive crop advice, irrigation guidance, weather-aware recommendations, and symptom-based troubleshooting.
- Smart Semantic Search: marketplace searches work by meaning, so users can search with intent such as food benefits, nutrition goals, or crop use cases instead of exact product names.
- AI Product Description Generator: farmers can generate stronger product listings from a title, category, tone, and a few highlights.

The assistant also supports voice input and can surface IoT-aware responses when soil moisture or field conditions are available. This makes the platform feel like a connected AI + IoT farming tool rather than a simple chatbot.

Example Assistant Use Cases

- "My tomato leaves are turning yellow" returns likely causes, recommended actions, and related support guidance.
- "When should I irrigate?" combines moisture signals and weather to suggest the right watering window.
- "Will it rain tomorrow?" uses weather data to help farmers avoid unnecessary irrigation.
- "Which crop is best this season?" compares temperature, humidity, and soil moisture to suggest a crop.
- "Vegetables good for diabetes" can return semantically relevant marketplace products.
- "Organic Tomato, fresh, no pesticides" can become a polished marketplace description.

What Customers Get

- Farm-fresh produce harvested at peak ripeness
- Clear origin and farmer information for each product
- Flexible delivery windows, pickup options, and subscriptions
- Transparent pricing with seasonal offers and promos

How It Works (Customer Journey)

1. Browse product categories or search for items.

2. View farmer details, images, and harvest date per product.
3. Add to cart, choose delivery or pickup, and checkout.
4. Track your order and rate the produce after delivery.

Quality & Safety

• We partner with verified farms and perform periodic quality checks.
• Produce is packed with cold-chain where appropriate and labeled with harvest dates.

Pricing & Promotions

• Competitive, farm-direct prices with occasional seasonal discounts.
• Subscribe for regular deliveries and receive loyalty benefits.

Sustainability & Impact

• Supporting smallholder farmers with fair pay.
• Reducing food miles by optimizing regional deliveries.
• Encouraging regenerative farming practices through farmer partnerships.

Support & Contact

For assistance, returns, or bulk orders, contact our support team at support@navakrishi.example or visit our Help Center in the app.

FAQs

• Q: How fresh is the produce? A: Items list harvest date and expected shelf-life.
• Q: Can I order in bulk? A: Yes — contact support for farm-direct bulk pricing.

Case Study — Local Farm Partnership

KisanFarm (a small family farm) partnered with Navakrishi to sell seasonal leafy greens. By listing harvest dates, photos, and pack sizes, KisanFarm increased direct sales by 40% in a single season. Customers appreciated the transparency and repeat subscriptions helped stabilize the farmer's income.

Sample Pricing & Subscription

• Single order: market price + small delivery fee
• Weekly subscription: 5% discount, guaranteed weekly box with flexible skip/cancel
• Monthly bulk: contact for farm-direct pricing and free pickup options

How to Order (Quick Guide)

1. Search or browse by category.
2. Click a product to view farmer details and harvest information.
3. Choose quantity, delivery window, or pickup slot.
4. Checkout with card, UPI, or wallet; subscribe if desired.

Testimonials

"Fresh and delicious — the spinach lasted longer than store-bought." — Meera, Bangalore

Updated: concise customer-facing whitepaper. To include images or farmer logos in the PDF, add image files to `frontend/public` and I can update the generator to embed them.

This whitepaper gives customers an overview of Navakrishi's value, operations, and support. Update `docs/whitepaper.md` as needed, then run the generator script to create the PDF placed at `frontend/public/whitepaper.pdf`.
